RE: Covid-19 update

Dear Resident:

As of last Friday, Lake Winnebago had no reported cases of Covid-19. However as of Monday July 27th we now have 4 cases within our Community. I get a daily report from the Cass County Health Department of all cases in Cass County and will continue to monitor Lake Winnebago.

We still encourage face masks and social distancing, please keep crowds to 50 or less and wash hands often. If you need to conduct business at City Hall or the HOA office, please follow guidelines posted on entry doors.

I have also spoken to the Yacht Club about their Covid-19 safe practices, they will be posting an update this week.

We are very fortunate to live in a Lake Community that its easy to enjoy the summer and practice safe distances from others while on the lake. I highly recommend if you invite friends or family from outside the lake that you ask them if they have been exposed and make sure they do not have any symptoms.

Lets all work together to keep Lake Winnebago Safe.

Thank You,
